

## Coachman Caravan streamlines its payroll with superfast project from Autotime HFX

### Cost-savings through streamlined payroll

Based in Hull, the Coachman Caravan Company is one of the UK's leading caravan manufacturers. Coachman Caravan have built a bespoke reputation for high quality craftsmanship and attention to detail. The company currently employs 133 people - 101 of whom work in a factory environment and clock in and out daily. While Coachman only operate one shift each day, their Time & Attendance data needs to be collated accurately in order to ensure that staff is paid the correct amount.

#### Steve Shipley from Coachman Caravan said:

*"The new Autotime HFX system has helped to make us a more efficient company, especially when it comes to payroll and timekeeping. The system is predominantly used to collate Time & Attendance - if staff do not clock in correctly they do not get paid correctly!"*

Coachman previously used the Winbase recording software but it proved insufficient in coping with the demands placed upon it. Thus, it has been decided that it was time to replace the existing system with the latest Autotime HFX version. The company's Time & Attendance system has been developed in line with technical advancements of the workforce management industry, progressing from clocking card machines to a state-of-the-art workforce management software.

### The Business Solution

The project had to be completed within tight time scales to ensure it caused minimal disruption to Coachman Caravan's payroll process.

Autotime HFX installed the system 'live' within the pay week, meaning that Coachman's payroll was completed on Friday lunchtime and Autotime HFX swapped their data and hardware over within two days.

One of the main benefits of the system is that it has improved Coachman's payroll efficiency, thus accurately calculating the hours worked by staff prior to the payroll being processed. There is no ambiguity and everyone knows where they stand!

### About Autotime HFX

Autotime founded over 45 years ago, became part of HFX Ltd in 2018. The HFX group is one of the UK's leading developers of Cloud SaaS workforce solutions that provide organisations with the tools they need to control labour costs, increase their efficiency and minimise compliance risk in today's business environment.
